Photoshop has hundreds of features and a dense interface, while Elements has about 200 features and a highly functional and concise user interface. There is a very steep learning curve for Photoshop Elements users, so if you're just getting started with graphic design or photography, Photoshop Elements is not for you. Many of the features of Photoshop are built into a smart layer, which makes it easy to edit multiple layers of images. In Photoshop Elements, you use groups of layers to work on individual images in different ways. You can create groups to mix up your editing quickly and easily. There are no dropdowns or menus to navigate when you want to edit a group. Every tool is in a smart group, and you can edit multiple layers at once. The red and blue handles in Photoshop are useful to navigate the layers but can be confusing in Elements. This guide teaches you how to navigate and edit layer groups in Elements. Navigating a group of layers in Photoshop Elements You edit each of the layers in a group separately. If you want to edit several different parts of an image at once, you need to open a group of layers. Groups are your Photoshop Elements workspace. When you open a group, there are three panels: the Layers panel, the Groups panel, and the Arrange panel. These panels let you work on each layer of a group. Photoshop Elements Layers panel with Layers button with a group of images. You can press the Layers button ( ) to select which layers you want to work on. Or you can press the (x) icon on the Layers panel to select all layers. The empty area where you see the empty cog is where you can use the Filter function on that group of layers. Q: Is there a limit to class hierarchy depth in Java? I do not want to know if a class is subclass of another class but is there a (simple) limit to the maximum depth allowed in the class hierarchy? As a simple example, if I have a class Foobar, is it correct if there are many more classes of the form FoobarX which extends Foobar: class Foobar class FoobarX extends Foobar class FoobarY extends FoobarX class FoobarZ extends FoobarY Or is there some maximum? A: No, not a limit. The class is an instance of it's super class. So: Foobar FoobarX FoobarX FoobarY FoobarZ FoobarZ FoobarZ FoobarZ Can be considered a hierarchy. Though of course that's not what you want. Donald Trump has taken to Twitter to disassociate himself from an ad by a pro-Trump Republican Senate candidate accusing Tennessee's Democratic senator Bob Corker of raising the retirement age for Social Security recipients. The ad, titled 'Bob Corker is a Dangerous Liar,' is designed to portray the one-time Washington insider as a man who is only telling the truth when he says he'll be an adversary to President Donald Trump. 'Senator Bob Corker "is" a liar,' the ad, whose narrator is played by Trump supporter Joe Walsh, boasts. 'He is a fake, a fraud - the Obama-Trump establishment RINO.' The full-length one-minute and 31 second ad was released Saturday by the campaign of Marsha Blackburn, the GOP incumbent running against Democrat Phil Bredesen, the former governor of the state, in the November Senate special election. Tennessee Republican Senate candidate Marsha Blackburn has released a video to cast doubt on a central claim made in an ad by a pro-Trump group, saying Sen. Bob Corker 'is' a liar 'He is a fake, a fraud - the Obama-Trump establishment RINO' 'So to be clear, Senator Bob Corker is saying: 'I am not accountable to the citizens of the country I am supposed to be serving.' You are here Alternative Listing: Popular Navigation You are here Saul Goodman is the ultimate salesman. The sharp, fast-talking, and supremely confident Saul Goodman is a con man who claims to be a marketing expert and gets by on sheer charm, cut-throat negotiating skills, and ability to forge the most favourable deals. In the US incarnation, Saul is portrayed by Bob Odenkirk. He's an ex-lawyer who, after a career of tort law, finds himself in the television business and now works as an agent in the New York office of the network TV firm, "Loeb, Rhoades, and Greene." Though he's a bad manager, Saul is a great salesman, and increasingly he finds himself in the crosshairs of the law. His latest and final big mistake results in a successful lawsuit against his own law firm, where he is faced with a choice between being fired, going to jail, or helping solve a series of crimes in exchange for a reduced sentence in his own case. The BBC/Fremantle Media series The Mentalist is set in California rather than in Chicago, but it is intended to be a fictional version of the phenomenally successful actor on the late-night comedy, Who Do You Think You Are?, and his own series, Genealogy. The two main characters are Patrick Jane and his assistant Teresa Lisbon. Patrick is a former psychologist who has recently settled in Sacramento after being invalidated out of the San Francisco police department for reasons that are never made entirely clear. Teresa is a forensic accountant and police task force investigator brought in to assess the skills, dedication, and skills of Patrick. The people who hire Teresa are people who hire Patrick, or people who just want him to solve their case. In the US version, Jane is portrayed by Simon Baker. Baker is a former soldier who starred as a bipolar anti-hero in the British soap, EastEnders, and in the US had a starring role in Millennium. His character in Genealogy is very similar to his role in EastEnders, although here he tends to be a little more subdued, more of a hard man with a soft centre. Baker is very reminiscent of Patrick Jane in the series, although he is not the same character. Like Jane, Baker is a widower, but his wife's murder is never solved. In the UK version, Patrick Jane is played
