Open Autocad and open a new drawing. Open Autocad Academy > More > Training > Analyze > How to Use the Keygen. Select the Activation Key Files option. Browse to the full.exe file that you downloaded and select it. Open the "File" menu and select "Save As." Save the document as Icons on your Desktop (or any other suitable location). Close the document and reopen it. Open the File menu and select "Export" to save the "Icons On My Desktop" template (File > Export > Export File > Export File As Template). Open the Autocad Academy > More > Training > Analyze > How to Use the Keygen file you created. Select the Export To Icon On My Desktop option. It worked! Now when I open any drawing (like in the YouTube tutorial above) or open my Autocad Academy > More > Training > Analyze > How to Use the Keygen file, I get the correct icons on my Desktop. Please note: This process only works when the.exe file is located on your Desktop and the.inf file is located in your Autocad installation folder. I have not tested this for any other folder.
