Baixarn64pkgemuladorparaps3 Building for Cross-Platform Mobile With all the attention focused on developing for the web, cross-platform development has fallen by the wayside. Good luck building a coherent mobile app if you develop it with no knowledge of the broader platform. So, it's imperative that you master how to build for mobile devices, but use platform-agnostic code and utilize built-in native features. As a web developer, you already know that cross-browser and cross-device compatibility are not an issue. They're not uncommon. All browsers have at least one version of support; some better than others, but all you have to do to set things up correctly is support them all. The same scenario is true for mobile devices. Sure, it's not easy to build an app that works on all platforms, and platform-specific code can get ugly fast, but at the end of the day it's just a compatibility issue that can be overcome with sensible

coding. This can't be said about native features, which vary on different platforms, and for many are not even present. It's better to have no native features or platform-specific code than to code for the wrong platform and miss out on functionality. So, mobile devs, get on the bandwagon. If you've had your mobile device since the iPhone emerged and you haven't tried making your web apps look and feel like native apps, it's time to get with the program. You probably know you should treat mobile apps like web apps but how do you build a mobile app from the start?

Kirby-chur
Kirby-chur is a village and a civil parish in the Ryedale district, North Yorkshire, England. It is located a short distance to the north of the village of Kirby Misperton on the A170 road, west from Malton. The civil parish has a population of 128 (2001 census), increasing to 152 (2011 census).
