Rooting an Android device is great! It opens so many doors for developers and power users. Want to get root rights. And you want the device to turn into an Android computer. You can, of course, use a PC or device running Windows or Linux. These are good and handy tools. But there is also Windows 8 and Windows 10! You can also use Mac OS X if you have a Mac and want to root your Android device. This is a good opportunity to explore, but what happens when you try to root a device that isn't actually running Mac OS X?
