Developer Patch Notes: Hitchhiker's Hack is a 3.3.5 mod which is intended to fix, change, and add new features to The Hitchhiker's Guide to the Galaxy. This particular mod is intended to fix the quest "Missing Hitchhikers Glitch" in The Hitchhiker's Guide to the Galaxy, the glitches are most likely caused by a patch. You will install the Mod from the website through the Launcher, and the other

way is to download the Mod off the internet or install it manually. I do not recommend downloading the Hack from the internet because you may have to delete the mod from your game in which case you would have to download the mod again, and then lose the modification you downloaded the first time. The Hack is already in the Launcher, the only problem you may have with installing the Mod is that the Launcher adds the Mod as a neutral mod. Meaning, it is not automatically picked up by the game when you start the game. In order to get the Mod to be picked up, you must start the game, and then go to World of Warcraft | Interface | Addons | Type Mod-your Mod name (the small window to the left of the update button). After that is done you can type in your DLC-your DLC name (the screen is in french here), after
