Drawing For Children is a simple drawing program especially addressed to children. It's aimed at those who are just starting to learn how to use a computer and still doesn't need many configurations. It's pretty much a quick and easy program that requires no computer knowledge but that still makes use of all the computer resources. The program is very simple but is still able to provide children with basic tools, with the help of which they can create whatever they want. Kids love to draw, and this is another reason why this program is specifically addressed to children. Children can combine what they want, they can draw whatever they want, and with the help of the simple tools and the very colorful interface, the program offers them maximum freedom. The program features a solid interface, with a colorful and easy to follow menu bar. The menu bar allows the user to access the tools, choose what can be done, and choose what can't be done. Simple tools are available, with short and intuitive instructions, and kids can create a lot of things with them. They can draw anything they want, and these new drawings are saved in a default file that can be renamed and be printed, if needed. There are also tools that make use of the entire computer for children. They are the shapes, stamps, cliparts and backgrounds that kids can create with great ease with the help of Drawing For Children. They can create those in many different sizes, with the help of the settings, they can create multiple copies of the shapes they create, and they can even resize them to a desired size. Kids can choose from a selection of backgrounds for their pictures as well. The drawing program also features some effects that kids can use to create a lot of different pictures for their work and play. The effects that can be used with the program are psychedelic, rain, beam, lights, and many more. Kids are also allowed to save their drawings with the help of the program, and they can then be printed later. There are also some functions that can be used with the program. These include the undo and the settings options. A lot of features make the program unique and amazing. You can activate the settings or change the visible buttons and the pre-defined options that are available. This allows the users to use the program with a specific profile that's address to different needs and wishes. Experience a new type of pen and paper drawing.
