What if you could face the ball from even more angles? What if you could see the pitch up close and from a perspective you've never seen before? The new Field Play Feature allows you to create a field from a variety of angled positions, which is the closest you can get to having your own personal F1-style virtual pitch. Here's how it works: Select a Field Location from the Field Play menu Select one of the Field locations and press the Fire button to have the ball bounce toward the sensor from that spot. Your effort will determine the trajectory of the ball and its velocity. Then watch in real-time as the field and ball move and react as you strike. The Field Play feature will be available in your game after the official release of Major League Baseball 2K11! Breathe life into your pitching grip Increase the power of your pitches, and relax your fingers even further thanks to the Pitch Revive Grip customization feature. Pitch Revive is at its core an accessory to the Field Play feature, but it can be used on its own to make pitches that are even more impressive. Pitch Revive allows you to display a soft, rubber grip on the ball so you can grip the ball like a pitcher would. Once the ball is in your stylus is on the screen, you will see the grips from all angles. You can customize the exact placement of the grips and the number of grips on the ball. Pitch Revive will only be available for batting and pitching operations. Get even more out of your pitching logic Updated pitching logic lets you increase the power behind your pitches even more. When you hold the right stick down, the ball will return to your hand at full velocity. When you held to the screen, ball will return so you hand at full velocity. When you held to make sure the ball strikes a certain spot, be it a zone or the batter, the new Strike Zones let you get even closer. Put a Strike Zone over the plate, and the ball will make the same contact if it strikes that Zoned area. If a ball is not hit inside that zone, it will be forced in a different dire
