"Barbarous priests and decadent nobles will shape this land in the next thousand years." **The Elden Ring Game is the property of Palm Inc.** For a long time, there was the widespread view that the speed of light was a fixed property of the universe. Now, thanks to new research, its value is known with precision to four decimal places, opening up exciting possibilities for exploration by astronomers and cosmologists. In a discussion paper published in Science on Monday, the American Astronomical Society outlines what it calls the 'accumulated wisdom' about the speed of light, which is about 186,282 kilometres per second, or 300,208 miles per second. The value is based on the idea that electromagnetic radiation travels at the same speed that it does in water, and that this intrinsic property 'is unaffected by the motion of the emitting object' — the light is an intrinsic part of the electromagnetic wave rather than something added on top of it. For one thing, it is a pretty neat property that — as far as scientists know — we can't change, despite the work of theoretical physicists suggesting otherwise. Another thing is that the value has proved to be incredibly useful. "The concept that we all use is that the speed of light is 'universal' — it doesn't depend on which frame of reference you're looking at," said Thomas Zurbuchen, an associate professor of physics at the University of Chicago. "If you're measuring the speed of light in water, you get the same number, no matter where you're watching from. It's a wonderful thing — the consistency of it — that I think is one of the strengths of the theory." This is relevant to astronomers because if you use one of the most basic principles of astronomy — that space is expanding and that the light from distant objects is getting further away as the universe ages — then the speed of

Features Key:

A Greater Evil Than Myth Based on the prequel program of the TV anime “Sword Art Online: Hollow Fragment,” the fantasy action RPG, Elden Ring, features an original story that tackles issues of the real world.

Action-Packed VR Minigames and Through-the-Field Exploration An action-packed VR minigame, “Rage Labyrinth”, that shakes up the usual turn-based combat conventions of adventure games, and exploration using the Arrow Keys.

A Fantasy Adventure in an Ancient Hall Obtain Amulets and explore a three-dimensional Ancient Ancient Hall full of mystic voices and sounds.

Brilliant Art Design The immersive environment comes to life with brilliantly rendered 3-D environments.

Cross-Platform Play with No Lag Fight with friends playing on different platforms and different devices.

TOKYO, 7 OCTOBER 2017 - ATLUS today announced the official release of Elden Ring, the new fantasy action RPG developed by CyberConnect2. Set in a vast world where the Lands Between is sliced in two by a magic dimension called the Void, Elden Ring is a new fantasy title with a powerful mythological theme that merges turn-based action RPG and physics-based combat. The Void will also act as the main setting of the game's prequel program. Featuring a massive world that allows free exploration through vast fields and caverns, an original story which tackles issues of our modern society and lightning action-packed fights, Elden Ring is a new take on the fantasy action RPG genre.

Elden Ring Key features:

- An Action-Packed VR Game where Fantasy Meets Reality In addition to multiplayer, where you can directly connect with other players and travel together, the game supports a unique asynchronous online element that allows you to feel the presence of others.

Elden Ring Official Game features:

- A Greater Evil

Harmonix One / SteamUpcoming Game Old School RPG Game Game designers have a deep respect for the many "Lost Treasures" seen as remnants of civilizations that have come before us, and they often derive inspiration from those legendary games for games that were never released. Jason might not be the first person to suggest that the next big thing in gaming will be an adventure RPG, but in a medium already dominated by infinite sequels, he shares that dream with a passionate pitch for just that.
