When I try to replace it with sed it gives me this error: -bash: sed: command not found This is my

command: sed -i '/InputType/ s/path:/new/g' example.html A: sed with content to a file In your sed command you are trying to replace a pattern inside a string with new value. But in bash, there is a problem in switching the file current position and assignment to the old text. $ sed '4s/path:/.' new.html sed: -e expression #1, char 15: unknown option to `s' $ sed works with a file, not with a string. So it should be the 4th pattern or just the s command. sed's/path:/new/' new.html sed's/path:/new/' sample.html >new.html sed -i's/path:/new/' sample.html sed -i '4s/path:/new/' sample.html #

He is the most prolific sales letter writer in the history of sales.Data transfer, or telecommunication, refers to the exchange of information between electronic devices via a medium such as a wired or wireless communication channel. For example, data transfer can refer to the exchange of text messages, emails, or data files via a telecommunication channel. Electronic devices (e.g., computers, mobile phones, and the like) can exchange data via a communication channel in a variety of formats. For example, a data file can include a group of data bits that are organized in some manner (e.g., according

to the type of data, a row of data bits organized by size, etc.). Electronic devices can access the same data file via a communication channel, and can read the data bits from the data file via a transmission channel and write the data bits onto a receiving channel. A common form of data transfer uses a "streaming" transmission channel because the data bits are received and transmitted simultaneously. For example, a mobile phone can transmit a data file on a wireless communication channel and receive the data bits transmitted on the wireless communication channel. In some cases, the receiving channel can be an input channel and the transmitting channel can be an output channel.The present invention relates to optical switches and, more particularly 6d1f23a050
