In Wanderlust Adventures you are a fugitive and all you have to protect yourself is your wits and an assortment of charms and weapons. Explore a world inspired by ancient myths and cultures, face deadly obstacles, make some powerful friends, and unravel the secrets of the demigod known only as "The Maker". Time is tight and you need every ounce of focus. Wanderlust Adventures is the first in a planned series of interactive adventures. In Wanderlust Adventures, you choose the path for your character and help to shape the storyline. The puzzles, enemies, allies, and events will be different in every story. You are at the very beginning of your adventure. There are no rules but don't be afraid to change them. Key Features: • Explore a Fantasy World inspired by Ancient mythologies and Societies. • Fight Baddies, Collect Chaos Orbs, and Defeat Monsters. • Get Help from "Chaos" Creatures. • Improve your Skills and Invest in new Moves, Charms, and Weapons. • Dive into an Adventure that is unlike anything you have played before. • Choose which Hero to Play as. • Collect and Use a Variety of Charms and Weapons. • Spoilers and Hints are hand-placed to help players along the way. Hints are hand-placed and not implemented into the game. They can only be found on the WEBSITE.Q: Appending a string and a dataframe column Trying to append a string and a dataframe column and it seems that is causing a key error: data\_next = data\_current.copy() data\_next['data1'] = str(data\_current['data1']) + str(data\_current['data2']) data\_next['data1'] = data\_next['data1'] + str(data\_current['data1']) df = pd.concat( [data\_current, data\_next], axis=1, ignore\_index=True) I get the error KeyError Traceback (most recent call last) The function I'm using to get the data in the first place. This gets the data from the National Weather Service,

## **Faircroft's Antiques: The Mountaineer's Legacy Features Key:**

This war theatre is very exciting to play, especially for the first time. All enemies appear at the same time, and you need to attack, defend and kill them in the shortest time period possible. The best strategy is to collect the fastest ship, land or at the far end of the battleground, and then attack enemies with strongest attacks to defeat an enemy before it attacks you.

Each army has different weapons. Choose guns to make your army more potent. Fire on enemies to damage them. Capture and upgrade guns to become more powerful. Spend Gold Coins to upgrade guns.

There is an airplane to help you find and defeat enemies quickly, and there's an airplane also to help you attack some enemies. You can fire range weapons like cannons, rain bombs, air strikes and rockets to weaken enemies and make them more available for attack. Make it rain bombs on them, to have a headache.

## **War Theatre**

### **War Theatre Game Instructions:**

**Each enemy you defeat will be raised in rank. Advancing to the next rank will get you more Gold Coins per game. The game ends after you reach the first rank.**

**Landing on the island will get you the same amount of Gold Coins, and you can purchase all the weapons available. Find guns, however, in the ship and keep them. The ship can be upgraded with Gold coins, too.**

**Note: There are ten game levels in this war theatre. Kill all ten enemies to get the highest rank.**

To play the game, click on a ship to launch an attack, or click on the airplane to fire a weapon.
