“By delivering authentic high-intensity game play that truly feels like you are on the pitch in Fifa 22 Cracked Version, the game will continue to set the benchmark for the FIFA franchise for many years to come,” said Hans-Joachim Niebling, CEO Electronic Arts. “We’ve taken a different approach with EA SPORTS FIFA 22, and asked ourselves why we are doing something, as opposed to simply replicating what we have done in the past. We felt it was important to capture the realism that we all desire, and "HyperMotion Technology" allows us to achieve this.” Key Characteristics Control and Feel Enhanced FIFA 22 introduces “HyperMotion Technology,” a new motion capture technology allowing the game’s match engine to create more realistic motions. The training structure of the training mode in FIFA 22 now has improved, enhancing the detail and making the training feel more responsive. Accurate Player Physics Player Behaviours and AI behaviours have been tuned to ensure players feel more responsive in all on-field situations. This should result in more realistic celebrations and reactions to goals as well as how players move and play the ball. Advanced Goal Kicks The new match engine has improved goal kicks so that players are able to cut out more and create more realistic goal kicks. If players kick the ball at a specific angle and distance, the ball will roll towards the player’s foot. Improved Playmaking FIFA 22 takes the skill of the player 10 steps further. The game engine has also been improved to allow players greater vision into the opposing team’s play with the new counter-press system. The new “force player” position will give an opponent more attention and keep the ball out of tight situations. Increased Amount of AI Ball Retention FIFA 22 delivers added AI intelligence from the players and assists. FIFA 22 gives more attention to the game’s ball as it is given more weight and intelligence. Referees are given better reflexes, more focus and a more detailed, real-time presentation of fouls. Fouls are also more likely to be penalised in the correct area of the pitch.
