File Junction is an application to create, delete or move groups of files. A project will be defined with information on the folders and the libraries required. Files which are part of a project will be connected in a single file junction. Junctions can be added or removed from the main file in order to break them down into smaller smaller ones. In addition, you can also export a new file as a new project. You can also add or remove files from existing junctions. You can also add or remove folders to the project, which will activate the junctions associated to them. Once completed, the library will be saved with the names of the folders, if any, used as shortcuts to the folder in the library. You can export or move the project to another location. Features: • Create and remove junctions• Import / Export projects to manage project libraries• Add or remove folders for your projects• Add or remove files to your project• Export a project with the names of the folders and the files used as shortcuts Source Code: Party (Nepal) The Workers' Party of Nepal (समिक्रमिक शकसिक पार्की, Nepali: समिक्रमिक पार्की), or the Terai Party (simplified Chinese: 泰尔党), was a communist political party in Nepal. It was founded in December 1989 by Basanta K.C. and was led by him. After the coup d'état of 25 December 1990 the party was absorbed into the Communist Party of Nepal (United Marxist-Leninist).
