

Using Elements to edit your photos Elements is a digital imaging application that enables photographers to manipulate images in many ways. To help you get up to speed, you can click the "Learn more about Photoshop Elements" link and access the product's web page at www.photoshop.com/products/elements/, which includes links for additional help. Elements enables you to move, rotate, scale, crop, and combine images in a variety of ways, as well as sort, copy, and delete images. You can crop a picture by using the Crop tool, as shown in Figure 6-3. You can also remove unwanted parts, such as the sky, by using the Cutout tool. If you need to remove an object completely, use the Eraser. **Figure 6-3:** You can use the Crop tool to resize an image, as shown here. When working with graphics, Elements has the same editing features that you would use in Photoshop. You can change colors, add effects, and apply textures. You have a choice of 300 different color schemes, which make any image you create look unique. Elements also has all the features that Photoshop has, including a selection tool, vector-based editing tools, layers, and filters. Like Photoshop, you can work with many different formats of digital images, including RAW images, JPEG, TIFF, and GIF. **Figure 6-4:** The Crop tool enables you to resize images. Photo by Jim Minkin

Because the free version is so small (less than 5GB) I recommend downloading and installing a paid version of Photoshop Elements. This is a guide to the basic features available in Photoshop Elements.

A. Basic Features Selections

The basic tool in Photoshop Elements is the selection tool. This tool allows you to select an area of an image that you want to edit (like cropping or resizing), duplicate, or move and paste. The tool is unique in that you can select an area within an image and then move that selection across to another image. You can also click to deselect areas and use the selection tool to paint around your selection. The selection tool can be found in the toolbox under selection tools. The left-click and right-click menus allow you to select objects.

Image Editing

Since Photoshop Elements is a small editor, it doesn't have all of the tools you would find in more fully-fledged versions of Photoshop. However, it does have a good selection tool and basic features like shape tools, basic tools for adjusting levels, and basic adjustment tools. Basic tools include:

Tool Description	Effect	Movement
Rotation	Straighten	Warp
Refine Edge	Paint	Selection
Eraser	Blur	Lighten
Darken	Color Balance	Crop
Rotate	Shear	Selective Color
Adjust Color	Effects	Corrections
Levels	Curves	Histogram
Type	Masking	Paths
Adjust Size	Tint	Gradient
Oil, Water, and other textures	Merge	Replace Color
Flatten Image	Emboss	Blur
Add a spot or layer of color.	Clear	Bleach
Fill	Luminosity	Posterize
Invert	Sketch	Smudge
Smoothing	Emboss	Adding Pop
Picture Frames	More advanced tools include:	Tool Description
Effect	Shadows & Highlights	Spot Healing
Brush	Perspective	Warp
Crop	Selection	Perspective
Smart Fix		

t even convinced me it's what I'm supposed to be eating. I like deli meat and meat and cheese and bread and potatoes. A freaking sandwich. I don't want to fuck up my metabolism or my brain or anything else by eating an organic turkey and beet sandwich every once in a while. And I probably wouldn't anyway, but I'm trying to stay positive about things. I just think the rest of you guys are eating too much. Thank god I'm not in the middle of that. I just think this might be a one off thing and I'm good either way. I'm also tired of people acting like they're doing me a favor and I'm flattered but it's just not necessary. I feel like I've earned the freedom to eat whatever I want. So, I am now eating huge big fat donuts every weekend at work. Like, who else is going to eat them? Not the catty health challenged chicks who tell me how gross they are? They deserve what they get. I don't care. It's a lot of fun. I enjoy the occasional donut. They're not evil or gross, they just taste really good. And they make you feel good about yourself. Even though I work in a donut shop, I'm not there to sell donuts, I'm there to sell coffee and tea. I'm selling, so if customers think I'm spreading donut disease, I'm not gonna argue with them.!
