Q: Understanding an evaluation metric in L2 regularization
Given the following weighted Least Squares Loss Function:
$$f(x) = \frac{1}{2} (y - x)^T Q (y - x) + g(y), \quad x \in \mathbb{R}^d$$

where $g(y)$ is a function which calculates the difference between y and a constant, and Q is a weight matrix. Now I understand that in order to promote sparsity, I want to penalize larger magnitudes of weights. By doing so, I can find the optimal y for which $\frac{1}{2} y^T Q y$ is minimized. The question is, how do I know whether or not the $\frac{1}{2} y^T Q y$ evaluates to a constant, or instead, if it's always a positive value. I think I need to evaluate this value at $y=0$, but am struggling to understand how to do so. The following example illustrates what I am trying to clarify: For a weight matrix Q of size $d \times d$, and a row-normalized vector w of size d , with $w_i \in \{0,1\}$. I want to determine if $y = w \odot \vec{1} + (1-w) \odot 0$ is sparse. My intuition is that $y=0$ iff $w=1$; however, in this case, I can evaluate $\frac{1}{2} y^T Q y$ as: $\frac{1}{2} (w \odot \vec{1} + (1-w) \odot 0)^T Q (w \odot \vec{1} + (1-w) \odot 0)$ which is either a positive or zero

Eighties Retro Headbangers For The New Generation: Part One I know it's tempting to call it a run... but it's actually all SIXTEEN pieces, which means one whole month of thrashing around my living room should easily do it. This is Part One of a four-part series. I'll be throwing lots of swag/surprises on your doorstep come Friday, April 20th. All the articles will be posted each Wednesday until the 20th, and I'll get some chocolate to give everyone as a reward at the end. Part 2 is the defense of the sacred headbanger archetype, so be sure to check it out!

Skullbangers! Eighties Retro Headbangers For The New Generation: Part One Kane shreds on '80s breakdown and horror metal like there's no tomorrow, wielding tremendous innovations to modern-day thrash like two-handed axes. When someone calls for a tribute list for modern headbangers in this trend, he's not trying to insult anyone — he's trying to honor the legacy. There are hundreds of '80s-era bands, so my criteria had to be a bit narrow. Of course there's Labyrinth — a four-part starting list that will probably get me the attention of some deity (I hope). And I've got specific topical material to cover, like, say the band Slayer, and I've come to think of the Hellion record as a type of "episode" in a weekly tome on '80s retrosound. As a storyteller, these journeys into my understanding of '80s antiquities aren't complete without discussing either bands like Possessed that might be totally new to you, or Necrolord, which you might be familiar with thanks to its glorious inclusion on the Torture Chamber Ritual reissue. Finally, I wanted to recognize bands and records I'm hearing about everywhere, like Kreator's first demo, or Slayer's Hell Awaits even though we all know that by now. Not all these bands can be part of the main list, and that's fine — no matter how great your record may be, it still doesn't sound like Apocalypse Records, like a Hellion or Brainchild. But they do have their own

You have a group of player characters and a group of non-player characters that you direct, narratively, across a fantasy world. Roll dice, take actions, and determine the course of events! 13th Age has a robust character creation system that allows for a quick build and tons of customization, with thousands of possible character traits and roleplaying variations. Each character builds from a personality, or DYI (Do Your Ironing), and a class, which will take you from peasant to king. You can play a warrior, a wizard, a thief, a rogue, and hundreds of other specialized classes. Play solo or run games for up to eight players. With the Pulp Agency engine, every action you take generates unforgettable stories. 13th Age offers five different ways to roleplay: Classic, Turn-by-Turn, Storyline, Open Play, and Event Play. Classic is an old school, turn-by-turn style game, where players take actions and narrate the story as it unfolds. Turn-by-Turn is a free-form storytelling style where players set a scene and choose what happens next. Storyline is a streamlined version of the turn-by-turn style, using an experience-based system to determine what happens next. Open Play is an RPG Maker style, turn-based RPG where the GM and players have equal control of the story. Event Play is a creative variant of the Pulp Agency engine that combines elements of both turn-based and open play styles. A sophisticated combat system makes 13th Age easy to learn, yet exciting to master. Combat outcomes are resolved with clever dice rolls, and every strike leaves you vulnerable. The more difficult your foes, the more chance to land a blow. The attack roll is only the first step. Roll for extra effects, like status effects and critical hits. Play your way to victory! Developed by a dedicated team of industry leaders and award-winning developers, 13th Age is an epic roleplaying experience that stands out from the crowd. Tabletop games are a great way to enjoy roleplaying games, but they're also a great excuse to socialize and play games with your friends.

Once you have downloaded you will need to extract the files.

Open 4X game trial file using Winrar.

Open each of the files, “Game.ini”, “Properties”, “etc.” and “GameUnban.cfg” and open each of the txt files with Notepad.

Now find the file named “21_gameunban” and double click it to run the game for 21 days trial.

Once you complete this step it will automatically and immediately launch the game but you must be on the explorer interactive website to complete.

Now you have 21 days trial of the game.

And after all that you will be rewarded with OSRS gold and some BRS gold.

Once you have completed 21 days it will only start working automatically.

To get a full version of the game and achieve unlimited game play session, you will need a access key or something like it.

It costs 5 access keys that will go for about \$5.

Ordering new access key costs 35\$ from there website and 45 USD.

So to go quickly to order a new key is not an option with this method and I recommend not buying them for the OSR website, They make your order time take crazy long, you are better off ordering with a website that sells them.

If you have paypal you will be able to send money using paypal. Following their method you should be able to get your order in a matter of minutes or so.

Paypal order is a method of my preference, as well, and it ends in with your order being sent to you in a matter of minutes.

I can't really play the game as my time is limited as it would be for most of us.

I am also not really interested in losing out and deciding to just pay.

If you have paypal you will be able to have paypal shipments and speed is a suggestion, but it does take a long time.

I do it when I am busy
