It was a long time ago, when humanity was plunged into darkness. Following a catastrophic attack, a mysterious force rose up to guide humanity. With the Elden Ring, the mighty artifact that managed to withstand the attack, human civilization was revitalized. It was entrusted to the Twelve noble houses and became a sacred relic. In the centuries since then, the Elden Ring passed down from generation to generation. It remains in the care of the 12 noble houses, but in the Lands Between, the people had lost their trust in the Elden Ring and actively try to stop the Twelve noble houses from taking control of the Elden Ring. A rare opportunity has arisen for the Twelve noble houses to regain the trust of the people in the Lands Between and prove their power, but it has come at the price of the very existence of the Lands Between. This is The Best Candles Ever! They are made with random samples of hot wax that runs down your fingers and melts when you light them. It's the best feeling in the world, even better than giving a woman flowers for her birthday!!! We totally steal this idea from a long time favorite web site: They have them in every state, and the entire country. You also want to know, why you are always buying candles from the store, when you can light your whole living room up with the following!Tag Archives: Trace (dial-up) Remember when you walked out the front door at work in the morning and lifted your hand for those first six numbers to dial? You'd dial 3, then 1, then 9, then another 1... Once the phone company had your seven digit number they would connect you with the first available phone line for the area, a device called an LINC circuit. This was the direct-dialed line, with a TRACE dialer. I'm sure you remember that heyday, its the time of dial-up modems, when a high-speed network was ruled the domain only for respectable businesses and high-speed connections were rare. So here is a Quicktime movie that traces those first six numbers you dialed. Let's trace that first number one... Next number one... And finally we might be greeted by number four... Lets turn up the speed... See that match? The digits do match as expected. Digits 2 and 1
