Blackbox 2014 in my opinion did not live up to the hype that was created. If the hype was real then the game would have been great, however it was a hard hitter game. The first 4 maps are mind blowing (pattio, forest, sea and underground) and then the last 4 maps are meh. The maps that were below average were what made me return my copy of blackbox. Czar's, Ocean, Chemical Plant and Cyber because I do not see why the devs went back and added more challenge. Especially going from underground to chemical plant. At least underground had a minimal upgrade. There was a big upgrade to the plant and the map didn't need it. Other than the serious map balance problems there was a lot of issues. One being that the game had a 4 hour timer limit. Let me explain the system. At the start of the game you are given a random blackbox that has basic tools. As you play the game and you beat the map then you are given upgrades based on the amount of game you play. If you play 1 map and only last 3 minutes your rank will stay how it is, but if you play 100 maps, and only last 60 minutes your rank will fall. After the 4 hour timer, then the next player will get a random box with all the upgrades of the previous players. The only difference being that the box you get will never be as powerful as the last players box. For maps with a time limit we were told that the upgrade would depend on how long the player played. The problem with this is that the highest ranking player would also take the highest ranking player so a player could have a high ranking then have to start over with the lower ranking player. Since the highest ranking player who played the longest could d41b202975
