Pretty sure that i'll have to think hard and long to come up with something intelligent to say about this game, because I haven't played it. Just following the official site's development progress I have to say that I'm looking forward to it. What do you think? Castle Agony is a 2D action-adventure platform game. It was first released for the Intellivision (1987) and later released for MSX, Game Boy (1987), Macintosh (1988), Atari 8-bit family (1988), DOS, Amiga (1988), Nintendo Game Boy (1989), and the Atari Lynx (1990). It is the first game to feature both simultaneous and turn-based attacks. The game revolves around the main character, a warrior that must obtain the stones of 10 castles so as to put an end to the evil Dr. Demon's rising strength. By doing this, the player also has to ward off minions of the evil doctor who intend to use the shield stones for their own evil purposes. In addition, the evil doctor has also create robots to be used for his underling's army of robots. The game features both regular enemies and bosses whose power scales with the amount of shield stones that have been obtained. Castle Agony was developed by Infinity by Kazuhisa Hashimoto, who also contributed to the Mega Man series. It was followed by two sequels: Castle Agony 2: The Ultimate Sword (1989) and Castle Agony 3: Hero of Heroes (1990). As of October 2014, a remake of the original version has been developed by a fan. Gameplay In Castle Agony, the player controls the armored and sword-wielding warrior who must traverse (or fly, in 2-D side-scrolling versions) the screen in order to reach the center. If the warrior enters the inner ring of rings of the screen, he is dead and the game is over. The warrior is given three lives, which are refilled by a life-giving red crystal. When the warrior collects enough life crystals, he can then visit the item shops located at the left and right sides of the screen. There are three types of weapons: a sword, a pike, and a bow. When the warrior uses a certain weapon and that weapon cannot be used for a certain amount of time, it will be temporarily deactivated. When this happens, the warrior must use the other weapons in his arsenal instead. Each weapon is as powerful as another in terms of the number of life crystals, and weapon upgrades are

"I have a great one for you. How are you, Mr. President?" he said before getting into some Obama jokes, like the president not wanting to own the "Obamacare" brand and making fun of his "cabin fever." Obama also ignored Kimmel last week when he cracked that "he likes to smile at the camera." "I thought I was in trouble," Kimmel said. But Kimmel took a more serious tone when talking about the president. "He is the biggest loser of the decade," he said. "He lost in his first election. He lost in the middle of his term, and now he has lost again." Kimmel also made reference to the president's stunningly big inauguration crowds, saying he is so demoralized after his November victory, it's hard to even look at pictures of Obama's swearing-in ceremony. "The next time we look at that picture, he won't be there. He won't even be at his inauguration," Kimmel said.
