Dont mind, I am new to this game and in all honesty you haven't said how long it takes to load, at what resolution, how long it lasts, the aim is for it to play all at once with no load times. I have found that mods aren't installed correctly and maybe the script is wrong. I will have a play with different scripts that may work better and will give a better view of what I am dealing with. So far I find you should have alot of options in the game, including controller support, however I don't think you should be using the auto key combination to move the camera. An update was released and I think that it may fix many of the issues. I will try it later today. It's not the length of the game or the loading times that is the problem, it's the animation frame rates. I have a laptop with an i7 processor, Nvidia 1050m gpu, 8GB of DDR4 RAM, a 1920x1080 screen resolution and an SSD drive, and I'm getting frame rates at about 10 fps. I'm sorry, but I've already spent a bunch of money on the game, so I can't continue spending money trying to get a better framerate. I've tried switching to d3d from software rendering, to no avail. So, if you are able to help get the framerate up to at least 30 fps, that would be awesome. I'd even be willing to help with getting the modding community up and running as well.Ultrastructural observations on the branchiae of Heliocidaris crassispina (Oliv) Kott, 1853, in the starfish Asterias rubens L. (Echinodermata: Asteroidea). The branchiae of Heliocidaris crassispina (Oliv) Kott, 1853, were studied at the ultrastructural level using light microscopy and immunocytochemistry. Sclerocytes present irregular densities with small undulations at the same level, corresponding to a homogeneous matrix. These densities are considered to be an anlage of the basal membrane of the tentacle. Sclerocytes of the intraepidermal and subepidermal layers present varying arrangements: bundles, horizontal, parallel and perpendicular with the body axis. Each bundle consists of a central core of dark, dense fibres surrounded by bundles of less dense fib

### What's new:

**Tournament is the Strikeforce version of Ultimate Fighting Championship that stars those who have lived to duel another day! It's time to fight! Congrats to AcesPoker, ViperBoy, and Dreamworlds on their respective wins! They are now moving on to the finals! Who will be the Gail Kim, Kimbo Slice, Fedor Sonnen, Anderson Silva, Georges St. Pierre, Brock Lesnar, and Fedor Emelianenko of the Dimension Fight Tournament? We will find out in April QuakeArena Vitality\_Divine CastroFan Aces1inmyEars Dreamworlds Ikonmewbane Conclusion: This has been an interesting one. I felt this would be a hardmatch-up. So many things are moving that it was hard to keep it all straight. However, I think we're in a good position with the final four. At first I was pissed at Diviner for not being there and having to play catch up at the beginning of the fights. Then the tension got off and I really had to enjoy the fights. The brawl was close to two years ago in my head. The third fight was a nice one and gave me some questions answered. The fourth was a shocking one with the first knockout of the night but was a pretty close match-up too. Congrats to Aces1inmyEars, Dreamworlds, and CastroFan on their fight for the championship. This will be your next duel! Your next fight-days are Monday, Friday, and then today! Today's fight will be CastorFan against CastroFan for the second time! A fight will be taking place in the very near future! We have sent a much anticipated email out for the fight and people have signed up. Once we have the finalized fight the details will be made public on the Dimension Fight Tournament page. For those of you that have not yet entered we are giving away any knives you want! Click here to send us your knife. It is your last chance to get yourself a nice knife! Winner: Dimension Fight Tournament Fight Winner: I'm thinking some kind of cowboy punch. My main goal will be to cause either nose damage or damage to the chin or any other organ that isn't an arm, leg, or head**
