"Vaccine46" is the first and only Dual-Core Antivirus Antispyware Protection System on Earth!" "Did you, your mother, and your father ever go to the beercan mountains that are so near to our farm? It is a very beautiful place." "No, maam." "I never went but once." "How can that be?" "I was a girl. I used to go to the foot of the hill with my mother and my father to look for hazel nuts in the fall. But it was too early, or too late, I think, for hazel nuts. Sometimes I used to go up there with them, and walk alone into the forest to hear the wind in the leaves and the rustle of the dry leaves." "What kind of place is it up in the beercan mountains, maam?" "It is

## What's New In Vaccine46?

Vaccine46 is a ground breaking, revolutionary, dual-core antivirus, antispyware protection system unlike any other on earth. For most antivirus products on earth, their scanning engine are one core. They do not know how to multi-thread, their service, interaction with the Internet, or network-based scanners. Vaccine46 is a complete antivirus protection system, combining the best protection in the industry, with the most advanced detection engine in the industry, and the most well tested antivirus engine in the industry. It is a free antivirus package with a built-in detection engine and will always function the same as the retail version. The system is based on the most advanced two core scanning engines, developed by Immunity, InPier and Kaspersky labs. The detection engine in Vaccine46 can detect spyware, botnet, trojans, malware, keylogger, etc. Very important, and it can find worms or trojans even in memory, which most antivirus software cannot do. There is no better protection for your computer. The latest update of Vaccine46 involves integration of the cutting edge antivirus engine developed by Kaspersky Lab. Vaccine46 is now able to detect many new viruses, new rootkit, new worms, new suspicious activity, etc. Vaccine46 is built on a proven, scalable, and high performance yet highly secure (multi-thread and multi-core) platform that allows the engine to scan quickly and eliminate threats from anywhere on your computer. The Vaccine46 engine is extremely well tested. There are over 350 viruses, worms, spyware, Trojans, etc. Vaccine46 has encountered the latest threats, and your computer will always be protected from them. Vaccine46 automatically runs at startup. With Vaccine46, it is safe to surf on your computer anywhere, at anytime, without the worry of being infected by a virus or spyware. You can run the antivirus engine from Vaccine46 any time you want, anytime, anywhere. Vaccine46 is the only antivirus protection system that can run 8 antivirus engines in parallel, four each in Dual-Core mode and with an "Archived Scanning" mode, which is deactivated when you are not using the computer. You can have a completely secure computer without the worry of being infected by a virus, spyware, or trojan. You can surf without the worry of threats when you
