This is the official page for VueScan Pro 9.4.28 (x86x64) Multilanguage Pre-Activated download pc. VueScan Pro 9.4.28 (x86x64) Multilanguage Pre-Activated download pc.Q: How to Add more than 2 Child Views to a RelativeLayout and then Measure it in Android I want to add more than 2 Views (child) to a RelativeLayout and then measure that RelativeLayout. I know how to get the width and the height of the child and how to pass them to the parent RelativeLayout. The problem is I want to add more than two child views to a relative layout, but it seems like the way to add those is to add a View and then add another View to the last view that you create. Any ideas how I could do that? Is there a way to add more than one child view to a layout and then access them as if it was a separate child? A: There's absolutely no need to add the views as children of the parent view. You can always treat a RelativeLayout as a FrameLayout, where you can add as many Views as you want, and they'll be placed relative to the other Views in the same FrameLayout. With
