

You can take any video, trim the best part, merge with other videos, add a soundtrack. And for advanced users, it is possible to change the auto-cutting of music using the built-in editor of the built-in synthesizer. Adjusting the audio sound will not be a problem. In addition, the program has the function of synchronization with mobile devices. For example, when using a smartphone, you always have a recording of your favorite track with Sound Forge 14 at your fingertips. It will allow you to create a playlist of your favorite songs. The program has a wide selection of musical instruments: piano, guitar, drums, winds, violins and keyboards. SoundForge also has a noise reduction feature. It is possible to change the key of the music to get varied and pleasant music. You can choose the appropriate level for each instrument. The biggest plus of Soundforge is its simplicity. Even an unprepared person will be able to customize the program to suit their needs. When loading the settings, you will not encounter a single difficult question, everything is elementary. Using the program, you can record a track and edit it, but Sound forge does not have a function for editing music. But this is not an indicator of its poor quality, because it can be edited in other programs. The price for SoundForg on the Internet is 170-200 rubles. User reviews and comments about this program are also different, so it's better to look at them. What can be said about the program? In my opinion, it has great functionality, a lot of sound effects and settings. Promotions on SF run for several days, so its price is not exorbitant. In general, the program is good and can provide many opportunities for creating music. No wonder it is so popular, and is rightfully considered one of the best programs for creating music tracks. You can write a track and save it to your computer. Then use it in films, clips, etc. Personally, I have this program in my work. It's free and easy to use. In a couple of hours, you can create a full-fledged clip. Many functions, high speed and a lot of music are its best features. Like any other track maker software, SoundChat has its drawbacks. First, to start using this program, you need to install it, after which you need to download the package. The program is free, but costs 199 rubles. For people who do not know how to use computers, this program will be new. However, if you are computer savvy, you can certainly give it a try
