The problem I think is that you're saving it with the source code enabled: \$var=""; Then in the destination folder: Stemp_file = 'screenshot2.png'; file_put_contents(Stemp_file, \$var); Then try saving it again, this time with the source code disabled: \$var=""; file_put_contents(Stemp_file, \$var); If this works, the problem is that it is looking for a temp file and you are not able to move it because it's not being used. Q: How to add 2D Array with Dictionary in Python? My question is: how can i add 2D array to dictionary like we add as 3D, like mapping[key, value][key, 570a42141b
