Humans have lost contact with that region of space called the 'space highway'. In the last minutes of the crash, their only hope is one of the passengers, a mysterious passenger known as the 'K'. What will the K do in the time he has left and who will be the one to survive? Follow this adrenaline-packed journey and find out! In the last moments of the crash, the last few survivors rush to grab the mysterious 'K' passenger. He survived the crash but is locked in a cage, unable to do anything for himself. By escaping from his cell and getting out in the street, he will fight for his life. Can you survive, and who will reach him first? The rules are simple. There is a bounty on 'K's head, and whoever gets to him first, gets the prize. Each player can control only one bounty hunter in the train, and you will need to exploit the motion of the train, make it roll as fast as you can, and dodge obstacles and enemies on the way. But it's not that simple: on the train, players cannot use weapons or other devices. Bounty Train features three different modes. The Classic mode is a single player

game where players try to survive as long as possible with a single spaceship. The Team mode lets two players, or more, play simultaneously on different ships. The last mode is dedicated to players who prefer a more relaxed approach. The K mode, inspired by the stories of 'K's' escapades, is a dynamic story mode where players take control of the bounty hunters. Facebook just launched a new feature that lets you share the latest news from any given publication to your friends and followers, right from your mobile Facebook app. The feature, called "Headlines," lets you select from any of the top news sources on Facebook — from national news outlets like The New York Times, The Washington Post, and USA Today, to regional local news sites like The Oakland Tribune, Cleveland.com, and Bakersfield.com, to news sources from your friends. "The new feature also gives Facebook users the ability to share these stories in a way they haven't before," the company wrote in a statement. "While they're watching the news on the site, users can head over to their news feed to share the biggest stories with

What's new in BetWin:

- **Pro Supper as Good as Ninja Ramen** From other news, we might forget the sheer genius and pure brilliance when talking about the choco pixel series, but the Choco Pixel 3 is the 3rd Choco Pixel which proves that the 10 years old series is still going strong and nothing can stop it. The electronics were the work of Takehisa Tsuboi's group in Tokyo. Tsuboi worked on choco characters with squid ink on them - the brilliant bit is that they make edible art, hence delicious ones. They have the same high tech glow that's become synonymous with choco treats from theme parks, arcades, cafes. The choco pixel 3 is a \$18 pendant lamp that isn't quite the only use-able piece of electronic art though. It comes with an Arduino-powered NFC tag that allows you to comment on various aspects of the lamp like its milk flavor or current design and it gives you updates to the choco pixel 3's status via your iPhone or Android.

Choco Pixel 3: Ingredients, Anti Piracy The choco pixel 3 is made out of metal wire wrapped around bamboo that's also wrapped in a black and white patterned paper. The base is a super cute retro lampshade, the entire lamp kit comes (happily) with a regular plug and a long plug which probably used for the IoT tag system (slightly long DIY project). A power cable is used for battery power but the choco pixel 3 also works with an external battery that can be swapped in.

Flavor Attack I'll say this right now: there is no way possible I am going to publish a high-pitched sound diagram (which is literally a sample in the zip file of

**the electronics and choco pixel's) on my website as it's
insanely shitty. I showed them to every person I work with
in the space of a week and they all agreed that it was not
only terrible for the audio but also profoundly offensive.
The the best of chance I'm not gonna use it. But the
weirdest shit of the night is the 2nd element (read below)
that never had any form of testing done. The Milk Taste If
you knew the choco pixel 3, you'd know that the milk
flavor is actually pretty trash - it's almost as bad as the
2nd element**
