Chat with Facebook friends IM. Fun Games – Stop running, it's time for Mario Kart. Pick one of the 12 included racers, get in, and start spinning. Okay, now that we've gotten through how to install this, let's focus on the game. The interface is simple, but it's also colorful, so it won't look like you're having a mouse seizure. The system does a few things automatically, but it's fairly easy to go into it and tweak the driver settings. We'll get there in a moment, but the first thing you'll want to do is look at the different colored bars on the sides of the game window. When you move the mouse toward a bar, it'll tell you what

functions you can access with that bar, but the colors are not drawn to scale. In other words, you can't just read the colors and figure out what to do, you need to look to the bottom of the mouse that has the cursor and click on that bar. You can also click on the cursor to see the similar information but there is no scale. Just try to figure out what you need to do without scrolling so much, then just do it. OK, so the first thing you do is set it up. Go into the menu, and choose the option for drive and view. There are some pretty standard options here, but all the good ones are likely to be in the drive and view tab. First, make sure you've chosen the game drive, with others turned off. Now you have

to tell the game which three buttons are assigned to each of the paddles. You're not going to see this right away, so go into the options, and you can see the ones right away. For a while, the options were difficult to see. The next thing is to look at the steering wheel. You can choose one for the right or left, and again, it can be driven by simply pointing the cursor. There is a delay here, but that's only a minor frustration. Now, in the options, you have to assign the extra buttons to the joystick. You have three choices here. You can choose for them to be unassigned, use the default for the controller, or bind them to the buttons. Once you're all set, you
