Applesoft BASIC was an early, simple, interpreted, programming language for the Apple II family of microcomputers, and was standard equipment on Apple II computers from 1977 to 1984. Its syntax is very similar to that of BASIC on the PDP-11 family of minicomputers, but was designed specifically to make it easy to program and compile on the Apple II, and a language suitable for the new Apple II version without needing to be rewritten. In 1983, BASIC was the only official programming language for Apple II computers. IBM Enterprise Services Client/Server (ESC/ESS) is a client-server computing platform and a human-computer interaction that uses a personal computer as the client side and a mainframe computer as the server side.ESC/ESS is a client-server computing platform and a human-computer interaction that uses a personal computer as the client side and a mainframe computer as the server side. KVM is the Linux kernel-based virtual machine. A KVM is a virtual machine that runs inside a privileged software kernel with access to a central configuration file. It can allow multiple privileged software kernels to share a single machine at the same time by running multiple instances of a single privileged software kernel (also known as virtual machines) in the same privileged software kernel (also known as the main or host kernel). The CSS WWW Server is a free implementation of a web server (the World Wide Web) which uses the Common Gateway Interface. Tcl is a general-purpose scripting language. Tcl was developed by John Ousterhout at Bell Labs in 1987 as a means of interfacing to Unix programs. Tcl was designed to run on a variety of Unix platforms from the original Unix and SCO Unix platforms to Linux and Mac OS X. The Web server is the first software component in the World Wide Web. It allows client browsers to request documents from web servers, and may implement a web browser and a web page. The Web server is usually implemented by a Web application, which may include a web page and a supporting server program. It's a look back at the quarter century that has just passed and a review of the predictions that came true, the ones that came true, and the ones that came true, well, mostly true. We were right that one of our sons was going to be the first-round draft pick of the San Diego Padres. We were wrong about the player -- shortstop Alex Dickerson, the third overall pick -- but right about the franchise: The Padres will be the first of the San Diego Padres' 29 teams to make the playoffs in the NL West and the first NL team to win at least 100 games. We were also right about the second-round pick, outfielder Hunter Renfroe, and right about the first-round pick in the 2017 draft, shortstop Fernando Tatis Jr. And finally, our previous prediction was correct -- the development of Giants pitcher Steven Okert. You can see the full list of predictions we offered here and what came true below:Q: Javascript function doesnt work on my website but it works fine on some other websites I'm creating a website with the help of a custom template. Everything seems fine except the javascript code that I've included in the header of my template. It works fine in this website: When I add this code to my website it doesn't work anymore. It has the same structure as the previous website, just the included javascript has changed a1d647c40b
