Ответ на странице: What should I do to be able to download? A: You are using Cloudflare. If I look at your access.log in the CF logs for Cloudflare, I see a single event in 2017: [...] ACL 2 2017/07/17 23:30:51 [error] 17407#0: *111 open() "/etc/resolv.conf" failed (22: Permission denied), client: 172.17.0.7, server: 173.63.2.193.hh.ru, request: "GET /download/Street%20Legal%20Racing%20Redline%20v2.4.0%20pcap%20file/ http/1.1" [...] I'm guessing you have somehow resolv.conf (and/or other files in the /download directory) changed permissions and that CF isn't sharing this file in the Cloudflare VM, so you can't download that file. Now, you can wait for CF to restart the VM with the log and ask CF about this. Or you can ask you CDN to change the perms on this file in the Cloudflare-managed subdomain. EDIT From the log you pasted it is clear that the offending file is /etc/resolv.conf. So CF will need to know the file permissions to fix this. Again, I'm guessing that a CDN can restart the VM with the log. If you can't find a way to do that, then you can send an email to support@cloudflare.com and ask them to do it.
