Mehr 1, 1393 AP - make sure you have Direct x9 installed and a graphics card that supports pixel shaders 11). I ran the web installer and reinstalled. NET framework. When I put the key back in, the system started loading the installer. This time I installed the driver and restarted my computer as usual. This time everything went fine. I ran the web installer again and repeated steps 2 and 3. This time the installer didn't require a reboot. When I ran the installer, I got a window with the message "NET Framework 3.5.1 installed. Apply updates? I pressed OK. The installation wizard has started. I ran the web installer and updated it.
