A Major Video Game Release Debuts This MonthWith game's release, we'll see a new generation rise in order to maintain balance in the universe CLEVELAND, OH - April 20, 2008 - Zombie Studios™ , the developer of the upcoming online PC game Zombie Panic!®, today announced the release of Zombie Panic!: Invasion of the Chicken Invaders 4 for PC and PS2 systems on May 14. Zombie Panic! is an original PC game that features the classic zombie survival game, with the addition of multiplayer online gameplay, cooperative zombie slaying, and a new way to play. Zombie Panic! presents gamers with a unique blend of three classic zombie-survival gameplay elements in one crazy, fast paced game. Players have to traverse the alien landscape, avoid the alien hordes, fight off the invasion of the evil chicken aliens and rescue the human survivors. While doing all of this, they have to complete various challenges and survive long enough to complete the game. This unique combination makes for a fast paced, adrenaline fueled, survivor-style zombie shooter that's fun to play and challenging to survive. Zombie Panic! is an original Zombie Panic! game that allows players to move in three-dimensional space and view the action from multiple angles. In-game play involves the classic elements of survival in a hostile environment, including collecting food, items and ammunition; evading the rapidly advancing aliens, defending the perimeter and defeating the relentless alien hordes. Zombie Panic! is inspired by classic arcade games from the 80's, such as Gauntlet®: Slayer Edition, Day of the Tentacle, and Alien Rampage, and emulates the classic gameplay by adding teamwork, cooperative multiplayer and levels of mayhem and fun in the style of today's survival games. Cooperative multiplayer gameplay allows up to four players to join together as allies to defend the planet against the horde of invading alien chickens. A unique mode of cooperative gameplay allows for seven different cooperative multiplayer game types, including the classic team deathmatch and domination games, as well as new cooperative multiplayer modes such as survivor, base building, and tower climbing. Zombie Panic! uses a unique teleportation mechanic to help you navigate the alien landscape. Upon death, players will be sent to their next level. The level can be found in a randomly generated hub zone, or in a randomly generated environment from a completely different map (the maps cannot be accessed during gameplay). The playable levels are 3D and can be explored in

What's new:

"I am your quest pack. I am here to offer you the experience of being part of an already established server with a myriad of open-world, mythological, sandbox elements to explore. I am a heavily PvP Free-for-all server, filled with bounty hunters, miners, treasure hunters, wanna-be pirates, zombie survival specialists and kings of the hill. I'm a F2P server with no monthly fees, and I do not accept any fakes and other cheats. Imagine having an ongoing experience with servers that choose not to emphasize daily grind with microtransactions, and I guarantee that you will not be disappointed. Take your time off and enjoy because I'm also for the people who value a more civilized, relaxed and friendly atmosphere." EILF (Extra Iron-Large-Facts) is a huge, cannon-loving, base-building Sandbox-MMO-style (on top of a Steam-based Early Access) medieval war- & life RPG game with tons of stuff to see and do. Low to no microtransactions, full-on MMO gameplay for hundreds of players, single player, group, PvP, and Mythological storylines. That's a lot of stuff. One of the BEST things about this particular game is its daily (not hourly) content flow, and the fact that most of the worlds & servers come populated with over 100 Gods and Goddesses that spawn randomly every-time a new server is created. Meaning: being dragged to a base you've never been to before doesn't necessarily mean you'll be bored. Also the gods that spawn can come with unique items, or items of various gods, which will help to level-up your character. You can harness the energy from them, by conjoining it with other gods, or just simply destroy them, which will drop creatures scattered over the maps. It is a very well-balanced system that is mostly known for its long-lasting extra content flow. Adding to all the character classes, and the god system is the amazing character customization. Meaning you can choose the gender of the character, switch between different unique attires, have a different haircut, hair-style (you can make dreadlocks for example), fake names (no need to mention that dozens of character faker names are out there already on the market), and thousands of other customizations. It is one of the best in its game genre with a rich customization experience. The stats also come with unique models that
