Bryce Pardo, a 35-year-old Army veteran, was in a wooded area near his home on Friday, when he spotted a black pickup with a camper attached, The Seattle Times reported. Pardo, who served in the Iraq War, threw a military-style rifle into a ditch near his home and went to investigate. At some point, he recognized the pickup as that of a person he had seen on his property before, which made him worried, according to The Times. The pickup pulled into a driveway on the property and a man walked out and told Pardo not to be looking into the truck, officials say. Pardo responded that he had a loaded gun. From that moment, the two men disagreed, and the shooter got back into the truck and "raced" back toward the woods. Pardo followed, with his gun still in his hand. As he was in the process of getting back up into a tree stand, a man Pardo had shot in the past emerged from the woods, standing on the other side of the road with another man. Pardo fired, striking one of the men. The second man ran, but Pardo then fired at the running man, killing him. The Washington State Patrol says two other people were in the pickup, but

. THE MINIMUM SET OF EQUATIONS THAT DEPEND ON GIVEN MODELLING SUBSTRATE CONNECTIVITY The following minimum set of equations is used in the work : · The continuity of electromagnetic fields in the free space · The anomalous photon velocity equation · The photon energy-momentum equation · The electron hole equation · The Poisson equation · The Laplace equation · The Poisson equation · The free space electromagnetic fields equation. The continuity of the electromagnetic fields is satisfied in the free space. The continuity of the electromagnetic fields in free space is As r goes to zero, either of the two forms of the fields of the following equations is satisfied : %0 %1 %2 %3 %4 %5 %6 %7 %8 %9 A = i j a e b e c d d e e f f g h i j ae b e c d d e e f f g h i j ae b e c d d e e f f g h i j ae b e 82138339de
