----- Roblox is an online game hosting platform and game creation system developed by Roblox Corporation that allows users to create games in its platform (scripts, level editors, and game worlds), with others sharing in their creations through "playlets". Each game has a main script for code execution, and any additional scripts (for "levels" in the games) are known as playlets and can be executed within the platform. Created by David Baszucki and Erik Cassel in 2004, Roblox Corporation is the current version of the company founded by David. Roblox was released in 2006, and was initially developed solely for desktop computers and Macs, while a mobile app was later released. For most of Roblox's history, it was relatively small, both as a platform and a company, and Roblox's economic success was preceded by its success in the social gaming market, which grew from \$4 billion in 2002 to over \$20 billion in 2008. With the introduction of the Android app in 2010, Roblox Corporation adopted a strategy to expand into the handheld gaming market, which has grown at a rate of 40% annually since 2011. By 2012, Roblox Corporation ranked as the #1 largest game developer for mobile devices, with 275 million monthly active users of Roblox. In November 2012, Roblox Corporation became the first game hosting platform to launch a free-to-play model, alongside an overhaul of the website and mobile applications to allow for easier gameplay. In the first quarter of 2017, Roblox Corporation announced a 44% increase in annual revenue over the previous year, citing strong performance in mobile games and the launch of 'Showtime', a game that would provide younger users with content more appropriate to their age.[14] A year later, Roblox Corporation posted \$1.2 billion in annual revenue, marking the highest amount in the company's history.[15] With 160 million monthly active users by August 2020, Roblox Corporation is the largest privately held social platform in the world.[16][17] History Platforms The Roblox online game hosting platform and game creation system includes three primary components: Playblox is the name of the educational version of Roblox, designed for children aged 7 through 10; their tutorials do not require a Robux token.
