The reactor is China's first new-type graphite-moderated reactor, which is also the world's first single containerized graphite-moderated reactor and the first ever commercial reactor to be built according to the new Chinese concept, which is based on domestic raw materials and components and uses China's domestic two and a half tons of graphite a year as fuel. GR1 has been installed and started operating, together with the stainless steel vessel, cold-gas valve assembly, steam system, graphite rod production, feed system
