THE PROJECT. Make sure the software is downloading correctly. Then, it will start installing. I'm sure it'll take a long time to finish downloading and installing the software. . 4. INSTALLATION GUIDE : After all the installation is finished, you can restart your computer. If the software is having problems or errors then you may need to fix the problems or errors first. To do this, you will need to delete some of the programs using the program control panel. You should move the back up program to your computer's hard drive. Then, you'll need to download the program you wish to replace. Then, you can put the program on your computer's C: Drive. Once this is done, restart your computer. 5. UNINSTALLATION PROCEDURE : If the software was downloaded correctly and is functioning as it was expected to then you should complete the uninstallation process. You can do this by going into your program files folder. On your desktop, you will see the program file name. You'll need to right click on the program file name and click the delete option. Then you'll need to reboot your computer. 6. PROGRAM SOLUTION GUIDE : After you have done the installation you need to make a backup of the files you are going to work
