Windows Live Essentials 2012 is a useful suite that helps you deploy some of the most popular Microsoft-vetted apps of old for cloud storage, email, parental control, blogging, instant messaging, photo and video editing, just to name a few. These are as follows: Windows Live Family Safety, Windows Live Mail, Windows Movie Maker, Windows Photo Gallery, Windows Live Writer, OneDrive, and Windows Live Messenger. Support these applications, with the following release notes/troubleshooting page. The compatibility of Windows Live Essentials 2012 depends on the Windows version you are using. Below is a quick list of compatibility: Windows 10 Windows 10 supports Windows Live Essentials 2012. Windows 8 Windows 8.1 supports Windows Live Essentials 2012. Windows 7 Windows 7 supports Windows Live Essentials 2012. Windows Vista Windows Vista supports Windows Live Essentials 2012. Each of the Windows Live Essentials 2012 apps can be found here. All the docs are located here. You can also find the Support & Licensing page here. Enjoy the classic Windows Live experience and access all Windows Live services Windows Live Essentials 2012 allows you to use different features of Windows Live that you are likely to find useful in your everyday life. These include: Family Safety Windows Live Mail Windows Live Messenger Photos Family & Baby Windows Live Writer Contact Info Microsoft Office 360 Photos & Videos Windows Live Contact Info This guide will help you with your setup on each app. You can find detailed installation instructions here. Microsoft Exchange For Windows Live Essentials 2012, you can use different Exchange servers with the following functionality: Microsoft Exchange ActiveSync (MSA) is the Exchange server technology that enables your phone and PC to access your mail account, calendar, and contacts. This is the same technology used by many third-party email and calendar apps. MSA is available on Exchange 2010 and later. If you are using Exchange 2010 or later, you can use MSA to synchronize your Calendar, Contacts, and Email settings between your Windows Live Mail account and your mobile phone. Post Office Anywhere (POP3) is the term used to describe a type of email protocol. The POP3 protocol is used to access the contents of your email account on the Internet, which is similar to the functionality of the Mail app in Windows Live Mail. Direct Access (DA) is used to access your email account through a third-party email

#### What's New in the?
